

relocate the Department of Environmental Quality, I believe is the actual name of that entity now. Originally, there was shall we say a progressive request from DAS for a half million dollars to move Environmental Quality and several other agencies to solve some space problems at the State Office Building. Basically they've been agreed upon. We're not going to do all those things, but the Department of Environmental Quality, because we have passed a number of A bills in recent years that have significantly increased the size of that agency, that is an agency that simply does need more room, and the best way to accommodate that is to move that out of the State Office Building. And so what was originally a half million dollar request, the only thing the committee is recommending is we do move Environmental Quality, and that will be \$98,000 General Fund appropriation for next fiscal year for increased rent and associated moving costs. Number eight is placing an additional member of the Nebraska Indian Community Colleges on the Coordinating Council for Educational Public Communication, that's NEB*SAT. Number nine is some intent language with the EPSCoR. The Legislature, thus far in 1022, is recommending the funding of the EPSCoR program as requested by the Governor. In the Governor's original bill that was introduced in January there was the talk of a merger between the EPSCoR program and the present research initiative. This...since that time, for a variety of reasons, merging those two is simply...those two entities is simply unworkable. What this intent language does is simply says they will be not be merged. But certain coordinating functions will take place in regard to planning and how projects move forward and items like that, so there'll be more control over those two programs. Tenth is the State Patrol, the settlement in the Nebraska State Patrol between Mr. Booker, I believe it's Mr. Booker, I don't have the name in front of me, with the \$58,000 award that the court has ordered there. Eleven is a simple earmarking for...to...to...to...for a bill that we passed last year, making sure it makes sense in this year's appropriation bill. Number 12 is correcting an error in a cash appropriation to meet the actual recommendations of the committee. So that's the 12 items that are in this amendment. It's been printed, it is on Journal page 1660. That is the explanation of them. It's like \$103,000 this year is for the chiller at the Regional Center; \$98,000 '92-93 is the General Fund cost to move the Department of Environmental Control. The rest of these items either are cash, revolving or federal fund items, those are the only two with an impact on the General Fund financial status. And speaking of the financial
